Spring Networking

Thursday, May 18, 2017

4:30 PM – 6:30 PM

Melville Marriott, New York

Nurturing a Vision of Inquiry

Across

Science and Social Studies

New science standards were adopted in December 2016 and go into effect July 1, 2017. While there will be a change in the grade levels that topics are offered at the elementary level and less breadth and more depth at all levels the biggest change is a shift to three-dimensional learning. Three-dimensional learning represents the best professional practice in science education, combining disciplinary core ideas (content) with the science and engineering practices and cross-cutting concepts. We will discuss three-dimensional learning and how to begin to implement the changes that our new standards require in your districts.

PRESENTERS:

Mary Loesing, Ed.D. - STEM Chairperson in the Connetquot Central School District

Joyce Barry - Science, Technology and Research Chairperson in the Plainview-Old Bethpage School District

The New York State Social Studies K-12 Framework was originally adopted in 2014. The new curriculum incorporates key ideas, specific content and enduring themes that are consistent across all grade levels. The New York State K-12 Social Studies Resource Toolkit, which is based on the new framework concentrates on the Inquiry Arc and the Inquiry Design Model. In this session, we will focus on the implementation of the Inquiry Design Model for grades K-12 and taking informed action.

PRESENTERS:

Bryan Frank - District Director of Social Studies for the Connetquot School District

Mitch Bickman - K-12 Director of Social Studies for the Oceanside School District
